Servicing these land areas:  
**Midwest, Northwest**

**Tribal benefits include: (as of 6/30/08)**

- Midwest Region: Tribal management control over 226,000 total trust acres including an additional 65,000 (rounded) total allotted acres (40% increase)

**Examples of Reservation economic development benefits**

- Lac Courte Oreilles has tribal management control of 77% of the allotted acreage including 34 allotted tracts that make up 57% of the acres expected to be harvested and to produce \$1.4 million in stumpage over the next 3 years
- Lac du Flambeau has tribal management control of 91% of the allotted acreage and 97% of all trust acreage including 24 allotted tracts that represent 46% of the total 2,354 acres expected to be harvested and to generate \$1.1 million
- Red Cliff has had no allotted timber sales for 10 years. Through the ILCP, tribal management control is now 64% of the allotted acres. There are 2 proposed timber sale contracts on two allotments estimated to generate \$95,000
- Keweenaw Bay has increased the total number of allotted acres under tribal management control by 80% equating to over 10,000 acres
- Bad River has tribal management control of over 42,000 acres (a 70% increase). Tribal management control of 64% of the allotted timbered acres includes 37 allotted tracts that are expected to produce an estimated \$1.1 million
- Fond du Lac increased the number of allotted acres under tribal management from 5,000 to over 12,500 acres (123% increase). As a result, the Tribe has created a Tribal Logging Enterprise

---

Formerly unimproved allotment in Bad River.  
New house being built on leased land 2007

---

Allotment in Bad River which has tribal majority ownership.  
Paved subdivision road and one of four houses built

The following map of the Bad River Reservation is typical of the impact the ILCP has made in land tenure for the participating Reservations' ownership
